### Additional Technical Competency Area Requirements

A Technical Competency Area is a series of applied courses that provides students with mastery in a specific technical/vocational area. The TCA does not possess a general education core requirement.

Graduation requirements: A grade of "C" or higher must be earned in all courses applicable to graduation. Students must have an overall GPA of 2.00 on all hours attempted, including hours earned at all colleges and universities.

Students must meet pre-requisites before taking any given course. Students must earn a minimum grade of "C" in each required course and have a minimum 2.00 GPA to earn a credential. All BPCC students are expected to be familiar with College policies, requirements, procedures and regulations. Students must assume final responsibility for being acquainted with College policies. In no case will a regulation be waived or an exception be granted because a student pleads ignorance of the regulation.

Students pursuing associate degrees, academic certificates, or technical competency areas at BPCC must declare their intent to do so. Curricular requirements become effective at the date of the declaration of the academic major and do not date from the point of original enrollment in the College. If the student resigns or does not enroll for one semester, the student would have to meet the requirements of a new curriculum. The student is responsible for all the requirements of the degree program and should consult with his/her academic advisor regularly. Each student assumes the responsibility for scheduling courses which are applicable to degrees and for taking courses in proper sequence to ensure the orderly progression of work.
