Course Prefix and Number: OCTA 205                Credit Hours: 3
Course Title: Developmental Challenges to Occupation
Course Prerequisite: Enrollment in the OCTA program courses is limited to those students who have been selected and admitted to the professional phase of the program. Program courses are sequenced by semester and must be taken as a group each semester per program requirements and policies.

Textbooks/ Learning Resources:
Required Textbook:
Solomon and O’Brien; Pediatric Skills for Occupational Therapy Assistants, 4th Edition
Supplemental Text:
Wagenfield and Kaldenberg; Foundations of Pediatric Practice for the Occupational Therapy Assistant

Course Description:
This course will provide knowledge on pediatric health conditions. Topics include normal pediatric and adolescent development, development of occupational performance skills and areas of occupation, intellectual disabilities, and other pediatric disorders that interfere with an individual’s performance in areas of occupation (ADL, IADL, education, play, work, leisure, and social participation). The evaluation process and appropriate assessments will be introduced.

Relationship to Curriculum Design:
This course is designed to provide knowledge in the normal physical, cognitive, emotional, and social development of individuals from birth to age 22. It emphasizes the developmental sequence and the affects of disease or disability on an individual’s performance. Level I-A fieldwork is integrated throughout the course to enhance the comprehension and application of course content in a clinical setting, including but not limited to professionalism, affective skills, communication skills, observation skills, and clinical reasoning.

Learning Outcomes:
At the end of this course the student will be able to:
A. determine the stages of normal development in the infant, child and adolescent;
B. recognize common pediatric health and psychosocial conditions and their effects on the development of occupation through effective research skills
C. analyze and calculate assessment data and procedures and apply intervention strategies
D. Understand the role of the OTA in the OT process
E. Utilize OT assessment findings to appropriately select purposeful and occupation based intervention strategies for the pediatric population
F. Demonstrate effective oral and written communication skills in patient, family, caregiver interaction

Course Objectives

To achieve the learning outcomes, the student will:

1. Discuss appropriate models of practice and frames of reference for specific diagnoses. (E)
2. Articulate the role of the occupational therapy assistant and occupational therapist in the screening and evaluation process along with the importance of and rationale for supervision and collaborative work between the occupational therapy assistant and occupational therapist in that process as related to the pediatric population. (B.4.5) (D,F)
3. Understand when and how to use the consultative process where appropriate with the pediatric population (B.26) (D)
4. Discuss the effects of family dynamics and culture in the intervention process
5. Identify the principles of normal motor, cognitive, and language/psychosocial development in the infant, child and adolescent. (A)
6. Discuss the effects of disability on the development of occupations. (B)
7. Identify common pediatric health conditions and the role of the OTA (B,D)
8. Identify various methods of service delivery, settings and laws affecting the pediatric population (birth -22 years of age). (D)
9. Apply the general principles of development and justify a developmental sequence of skill acquisition in performance in areas of occupation (A,C)
10. Discuss common psychosocial and mental health disorders and their impact on occupational performance. (B)
11. Gather and share data for the purpose of screening and evaluation. (B.4.1) (C,E)
12. Gather and share data for the purpose of evaluating client’s occupational performance using the OTPF format. (B.4.4) (C,E)
13. Identify the progression of play skills and the relevance of play to occupational therapy practice (A, E)
14. Identify the sequences of feeding and eating, dressing and undressing, and grooming and hygiene development (A)
15. Identify strategies and activities used by OTAs when working with children with psychosocial disorders (E)
16. Discuss the types of group intervention for children and adolescents with psychosocial disorders (B,E)
17. Administer selected assessments using appropriate procedures and protocols (including standardized formats) and use occupation for the purpose of assessment. (B.4.2) (C)
18. Enable feeding and eating performance (including the process of bringing food or fluids from the plate or cup to the mouth, the ability to keep and manipulate food or fluid in the mouth, and the initiation of swallowing) and train others in precautions and techniques while considering client and contextual factors. (B.5.14) (E,F)
19. Identify strategies to assist the consumer in gaining access to occupational therapy services. (B.9.12) (F)
20. Use professional literature to make evidence-based practice decisions in collaboration with the occupational therapist. (B.8.3) (B,E)

Topical Outline

I. OT Practice Framework and its relationship to pediatrics
   A. Eight levels of pediatric knowledge
   B. Models of practice and frames of reference *
   C. Levels of OTA supervision
II. Family Systems
   A. Current issues
   B. Family dynamics
      1. Attachment **
      2. Parenting styles **
      3. Types of families **
   C. Family systems theory
      1. Implications for practice and intervention
III. Medical systems
   A. Settings
   B. OTA roles
IV. Educational systems
   A. Early intervention **
   B. Federal laws
      1. Disabilities defined by IDEA **
      2. 504 *
   C. Rights of parents and children
   D. Identification, referral, evaluation, and eligibility
   E. IEP
   F. Role of the OTA
   G. Clinical vs. educational models
V. Community systems
VI. Principles of Normal Development
   A. General considerations
   B. Principles
   C. Theories of development **
   D. Development of Occupational Performance skills (motor, cognition, language/psychosocial)
      1. Pre-natal
      2. Infancy, early childhood, middle childhood, adolescence
      3. Reflexes, reactions
      4. Development of cognitive and language skills
      5. Psychosocial and emotional development
VII. Postural control and movement patterns *CA
VIII. Developmental sequences *CA
   A. creeping
   B. sitting
   C. rolling
   D. standing/walking
   E. reaching/grasping
IX. OT Process and General Interventions
   A. Referral, screening and evaluations
   B. Intervention, planning, goal setting and treatment implementation
X. Anatomy and Physiology for the Pediatric Population
XI. Hand Development **
   A. Reach, grasp, release
XII. Vision
   A. Visual perception
   B. Visual motor integration
   C. assessments
XIII. Development of Areas of Occupation
   A. ADLs *
      1. Oral motor
      2. Self-care
      3. Personal hygiene and grooming
      4. Bathing and showering
      5. Toileting
   B. IADLs *
      1. Readiness
      2. Home management
      3. Community mobility
      4. Care of others
   C. Education *
      1. Readiness
      2. activities
   D. work/vocational
   E. Play/Leisure
      1. Definition
      2. Stages
      3. Acquisition
      4. History, relevance, theorists **
XIV. Introduction to Pediatric Health conditions
   A. Cardiopulmonary
   B. Musculoskeletal
   C. Neuromuscular
   D. Developmental
   E. Genetic and chromosomal
   F. Neoplastic
   G. Other
H. Implications for the OTA

XV. Psychosocial and Mental Health Disorders
   A. Overview
   B. Common disorders
   C. Impact of areas of occupation
   D. Data gathering and evaluation
   E. Intervention
   F. Therapeutic use of self
   G. Groups
   H. Pediatric Assessments

XVI. Childhood and Adolescent Obesity

XVII. Intellectual disabilities
   A. Measurement and classification
   B. Etiology
   C. Occupational performance
   D. Client factors
   E. OTA roles

XVIII. Assessments

---

Course Grading: The student’s grade for this course will be based on:

- Written Exams which comprise 70% of final grade (average of all written exams) and
- Lab Activities, Practical Tests, Fieldwork requirements and Participation which comprise 30% of final grade
  - Activities, Assignments, Professional Behavior and Attendance are 15%
  - Lab Practical Tests are 15%

Instructional methods include presentation, case studies, small group activities, video presentation, role play, and Level I-A fieldwork in a variety of pediatric settings.

Course Requirements:
In order to receive a grade of “C” the student must earn 70% of the total possible points for the courses and achieve all of the course requirements listed below:

- minimum of 75% average on any lab practical skills tests
- Satisfactory completion of all assignments (minimum score of 75%)
- Successful completion of fieldwork requirements - See Fieldwork addendum for specific objectives/expectations and assignments

Student Expectations:

a. Course faculty will determine if class absence is excused. Unexcused absences will result in a zero (0) for the exam, assignment, or class participation due on the date of absence.

b. One tardy will be excused per semester. All other tardies will constitute a decrease of one percentage point each in final grade.

c. Make-up work or exams for excused absences will be given at the discretion and convenience of the instructor.
d. 5% will be deducted for each day an assignment is late.

e. All written work will be typed and produced according to the *APA Publication Manual, 6th edition* unless otherwise indicated in assignment directions.

f. *Active* participation during class time, community outings, fieldwork experiences, and other professional experiences is mandatory. Passive note taking and silent observation is not considered active participation.

g. Professional development is an integral part of becoming an Occupational Therapy Assistant. Students are expected to accept constructive criticism from faculty and peers and modify behavior accordingly.

h. **ALL** appointment requests with faculty must be made in writing via email.

**Course Grading Scale:**

A- 90% or more of total possible points; and minimum of 75% average on laboratory practical tests and satisfactory completion of assignments and presentations

B- 80% or more of total possible points; and minimum of 75% average on laboratory practical tests and satisfactory completion of assignments and presentations

C- 80% or more of total possible points; and minimum of 75% average on laboratory practical tests and satisfactory completion of assignments and presentations

D- 70% or more of total possible points; and minimum of 75% average on laboratory practical tests and satisfactory completion of assignments and presentations

E- Less than 60% of total possible points; or less than 75% average on laboratory practical tests or failure to satisfactorily complete or present assignments and presentations

Students must have a “C” or better and a semester GPA average of 2.5 or better to receive credit toward the OTA program requirements and to move to the next level of coursework.

** Lab competencies are scored differently than written exams. All mistakes result in a point deduction for grading purposes. However, failure to demonstrate fundamental competency, safety or professionalism in the execution of the skill as evaluated by the course instructor(s) will result in an immediate failing score. The student will then be required to re-test on the skill preceding fall/spring clinical practice experiences with the specific scheduling and format for such being at the discretion of the primary course instructor but the responsibility of the student. The student will be given up to two additional testing attempts to demonstrate competency. If unable to safely, competently and professionally execute the skill on subsequent attempts, the student will be given a failing grade for the course and will not continue in the clinical program. The remediation scores will not replace the first attempt test score.

Students must have a “C” or better and a semester GPA average of 2.5 or better to receive credit toward the OTA program requirements and to move to the next level of coursework.

**Attendance Policy:** The college attendance policy, which is available at [http://www.bpcc.edu/catalog/current/academicpolicies.html](http://www.bpcc.edu/catalog/current/academicpolicies.html), allows that “more restrictive
attendance requirements may apply to some specialized classes such as laboratory, activity, and clinical courses because of the nature of those courses.” The attendance policy of the OTA program is described in the OTA Clinical Handbook.

**Nondiscrimination Statement**

Bossier Parish Community College does not discriminate on the basis of race, color, national origin, gender, age, religion, qualified disability, marital status, veteran's status, or sexual orientation in admission to its programs, services, or activities, in access to them, in treatment of individuals, or in any aspect of its operations. Bossier Parish Community College does not discriminate in its hiring or employment practices.
