Course Prefix and Number: OCTA 216  Credit Hours: 1 (lab)

Course Title: Therapeutic Interventions II

Course Prerequisite: Enrollment in the OCTA program courses is limited to those students who have been selected and admitted to the OTA program. Program courses are sequenced by semester and must be taken as a group each semester per program requirements and policies.

Textbooks/ Learning Resources:
Required text:
Meriano and Latella; Occupational Therapy Interventions, Functions and Occupations

Supplemental text:
Tubbs and Drake; Crafts and Creative Media in Therapy, third edition

Course Description:
This course will provide knowledge of a variety of media and functional activities that will be used to increase the individual’s participation in areas of occupation across the life span. Topics include an emphasis on recognizing and choosing appropriate activities based on a person’s needs, abilities and goals and adapting, altering or designing equipment, activities and/or environments that support participation and independence in all areas of performance. Observation skills, activity/task grading and analysis, media and ADL activities and equipment and their therapeutic value will be expanded upon.

Relationship to Curriculum Design:
This course is designed to apply problem solving and critical thinking skills in the design, selection, modification, and grading of activities and equipment and in altering or modifying the environment to increase a person’s occupational performance.

Learning Outcomes:
At the end of this course the student will be able to:
A. Demonstrate problem solving and critical thinking skills when analyzing activities and task demands in order to develop and grade appropriate therapeutic activities that support independence in all areas of occupation;
B. Demonstrate ability to adapt equipment and environment to meet patient’s needs according to physical, psychosocial, and cultural contexts under the supervision of and OTR;
C. Demonstrate the ability to utilize therapeutic media as an intervention strategy to facilitate treatment goals;
D. Demonstrate the skills needed to successfully train individuals in compensatory strategies to increase independence with ADLs and IADLs, and functional and community mobility;
E. Demonstrate knowledge of selected conditions and how they impact occupation, psychosocial demands, performance patterns, activity demands, and client factors;
F. Demonstrate understanding of remedial and preparatory techniques to improve all areas of occupational performance;
Course Objectives
To achieve the learning outcomes, the student will:

1. Demonstrate ability to participate and instruct steps involved in performing a variety of media and craft activities. (C)
2. Select and justify selection of appropriate therapeutic, media and craft activities to facilitate goals that are meaningful to patient/client. (C)
3. Explain the general principles for conducting assessments of range of motion, strength, sensibility, edema, soft tissue and function in acute hand injuries (C, E)
4. Explain the treatment principles for selected acute hand injuries (A, D, E)
5. Perform specific assessments and treatment techniques used for acute hand injuries (A, D, E)
6. Demonstrate the ability to educate, consult, and train client/family/caregiver to facilitate occupational performance skills. (A, B, D)
7. Provide training in self-care, self-management, and health management and maintenance, home management, and community and work integration. B.5.5 (A, B, D)
8. Provide development, remediation, and compensation for physical, mental, cognitive, perceptual, neuromuscular, behavioral skills, and sensory functions. B.5.6 (A, B, D, E, F)
9. Promote the use of appropriate home and community programming to support performance in the client’s natural environment and participation in all contexts relevant to the client. B.5.17 (B, D)
10. Identify appropriate intervention strategies based on various performance skills and client factors in all performance areas (A, D)
11. Classify severity of burns based on % body region affected and skin thickness involved. (E)
12. Discuss medical management of burns based on surgical and non-surgical interventions. (E)
13. Discuss occupational therapy management of burns. (A, D, E)
14. Provide therapeutic use of occupation, exercises, and activities (e.g., occupation-based intervention; purposeful activity, preparatory methods). B.5.3 (A, B, D, F)
15. Adapt environments (e.g., home, work, school, community) and processes, including the application of ergonomic principles. B.5.9 (B, D)
16. Provide training in techniques to enhance functional mobility, including physical transfers, wheelchair management, and mobility devices. B.5.12 (B, D)
17. Provide training in techniques to enhance community mobility, including public transportation, community access, and issues related to driver rehabilitation. B.5.13 (B, D)
18. Grade and adapt the environment, tools, materials, occupations, and interventions to reflect the changing needs of the client and the sociocultural context. B.5.23 (B, D)
19. Teach compensatory strategies that support performance, participation, and well-being. B.5.24 (D, F)
20. Recognize the use of superficial thermal and mechanical modalities as a preparatory measure to improve occupational performance. B.5.15 (F)
21. Describe the role of the OTA in care coordination, case management, and transition services in traditional and emerging practice environments. (B.5.27) (G)

Topical Outline
1. Foundational Skills for functional activities
   A. Remedial Techniques for Pain and Edema
B. Remedial Techniques for Sensation
C. Remedial Techniques: Cognitive Perceptual Theory
D. Remedial Techniques for Range of Motion
E. Remedial Techniques for Strength
F. Remedial Techniques for Endurance
G. Remedial Techniques for Coordination
H. Remedial Techniques for Tone
I. Remedial Techniques for Cognition and perception

II. Arthritic Diseases
A. Description of major arthritic diseases
B. Medical management
C. OT intervention

III. Acute Hand Injuries
A. Physical evaluation and body functions
B. Functional evaluation
C. Goal-directed treatment techniques
D. Normalization of sensation
E. Specific interventions for selected hand injuries

IV. ADLs and IADLs
A. ADL and IADL Frames of Reference
B. ADL and IADL methods of intervention
   a. Remediation
   b. Compensation
   c. adaptation
C. Functional and community mobility methods of intervention
   a. transfers
   b. wheelchair mobility
   c. positioning
   d. driving

V. Home care skills and modifications
A. Cooking and meal preparation
B. Sewing and clothing repair and modification
C. Basic home care skills

VI. Burns
A. Classifications
B. Burn management

VII. Media and craft activities
A. Sewing
B. Fabric painting and printing

VIII. Adaptive equipment and Assistive Technology
A. Identifying patient/client needs
B. Appropriate equipment selection modification
C. Application of equipment

Course Grade: The student’s grade for this course will be based on:
- Written Exams which comprise 60% of final grade (average of all written exams) and
Lab activities, lab practical tests, and participation which comprise 40% of final grade. The 40% is broken down into the following:

- Activities and Assignments are 15%
- Lab Practical Tests are 25%

Instructional methods include lecture, presentation, case studies, small group activities, skills training, and video observation and analysis.

** Lab competencies are scored differently than written exams. All mistakes result in a point deduction for grading purposes. However, failure to demonstrate fundamental competency, safety or professionalism in the execution of the skill as evaluated by the course instructor(s) will result in an immediate failing score. The student will then be required to re-test on the skill preceding fall/spring clinical practice experiences with the specific scheduling and format for such being at the discretion of the primary course instructor but the responsibility of the student. The student will be given up to two additional testing attempts to demonstrate competency. If unable to safely, competently and professionally execute the skill on subsequent attempts, the student will be given a failing grade for the course and will not continue in the clinical program. The remediation scores will not replace the first attempt test score.

**Course Requirements:** To earn a grade of “C” or higher the student must earn 75% of the total points for the course and meet all of the following course requirements.

- Minimum of 75% average on any lab practical skills test
- Satisfactory participation and completion (minimum score of 75%) of activities and assignments

**Student Expectations:**

a. Course faculty will determine if class absence is excused. Unexcused absences will result in a zero (0) for the exam, assignment, or class participation due on the date of absence.

b. **One** tardy will be excused per semester. All other tardies will constitute a decrease of one point each in final grade.

c. Make-up work or exams for excused absences will be given at the discretion and convenience of the instructor.

d. 5% will be deducted for each day an assignment is late.

e. All written work will be typed and produced according to the APA Publication Manual, 6th edition unless otherwise indicated in assignment directions.

f. **Active** participation during class time, community outings, fieldwork experiences, and other professional experiences is mandatory. Passive note taking and silent observation is not considered active participation.

g. Professional development is an integral part of becoming an Occupational Therapy Assistant. Students are expected to accept constructive criticism from faculty and peers and modify behavior accordingly.

h. **ALL** appointment requests with faculty must be made in writing via email.

**Course Grading Scale:**

A- 90% or more of total possible points; and minimum of 75% average on laboratory practical tests; satisfactory completion of lab assignments and presentations

B- 80% or more of total possible points; and minimum of 75% average on laboratory practical tests; satisfactory completion of lab assignments and presentations
C- 70% or more of total possible points; and minimum of 75% average on laboratory practical tests; satisfactory completion of lab assignments and presentations

D- 60% or more of total possible points; and minimum of 75% average on laboratory practical tests; satisfactory completion of lab assignments and presentations

F- Less than 60% of total possible points; or less than 75% average on laboratory practical tests; or failure to satisfactorily complete or present lab assignments and presentations

Students must have a “C” or better and a semester GPA average of 2.5 or better to receive credit toward the OTA program requirements and to move to the next level of coursework.

Attendance Policy: The college attendance policy, which is available at http://www.bpcc.edu/catalog/current/academicpolicies.html, allows that “more restrictive attendance requirements may apply to some specialized classes such as laboratory, activity, and clinical courses because of the nature of those courses.” The attendance policy of the OTA program is described in the OTA Clinical Handbook.

Course Fee: This course is accompanied with an additional non-refundable fee for supplemental materials, laboratory supplies, certification exams and/or clinical fees.

Nondiscrimination Statement

Bossier Parish Community College does not discriminate on the basis of race, color, national origin, gender, age, religion, qualified disability, marital status, veteran's status, or sexual orientation in admission to its programs, services, or activities, in access to them, in treatment of individuals, or in any aspect of its operations. Bossier Parish Community College does not discriminate in its hiring or employment practices.
